I have always been passionate about Computer Graphics and Art, tinkering with computers for more than 35 years. With a background in both engineering and art, I am a versatile and creative problem solver.

For the first 11 years (2005 - 2016) of my career, I was involved in many TV and cinema projects. From working full-time at large studios with up to 400 people to freelancing, I worked across many different departments, environments, visual styles, and constraints. I consider myself a generalist, but with strong focus on technical art and matte painting.

Over the following 10 years, I focused more on programming and engineering as a technical artist, creating and optimizing content for Web VR first and later working with high-performance engines for AAA games.

My 20 years of work experience have helped me develop strong soft skills, allowing me to be productive, optimistic, reliable, and focused on problem-solving.

Work Experience

Embark Studios – Technical Artist Dec 2020 - Jun 2026

Worked more than 5 years in the world-renowned AAA game company using Rust, Blender and Unreal. Contributed to three different games (**wim**, **Arc Raiders** and a new undisclosed IP)

Mozilla – Product Designer Jun 2020 - Aug 2020

Product Designer of the **Firefox Reality VR** Browser, replacing a design system and substantially improving the workflow and the workflow.

Mozilla – Technical Artist Sep 2019 - Aug 2020

Worked in the Mozilla Mixed Reality Content Team. We tried to foster the WebXR ecosystem, making demos, writing articles and tutorials, improving the existing tools and creating new ones, like Blender add-ons.

Supermedium – Art Direction Sep 2017 - Sep 2019

Concept art, design and programming in the Supermedium VR Browser, websites, WebVR Apps and A-Frame components.

Mozilla - Technical Artist Sep 2016 - Sep 2017

Worked in the **Mozilla VR** team. Responsible for all the visual aspects of the main WebVR experiences made in that time, and contributed to their open source code. Also, researched and made concept art around different potential areas and products.

Lightbox Entertainment – Matte Painter Sep 2014 - Sep 2019

Matte paintings for “**Capture the Flag**” animated feature film

Freelance – Mattepainter, Concept Artist Feb 2012 - Sep 2014

Working for numerous animation and VFX houses like Aardman, Passion Pictures, Psyop, Glassworks Bcn & The Frank Barton Company in feature films and commercials (Pocoyo TV series, Coca-Cola, Gazprom, Seat, Nescafe, Kia, BBC Olympics 2012...)

Aardman Animations – Matte Painter Jan 2011 - Jan 2012

Matte paintings for “**Pirates! In an adventure with scientists**” animated feature film

Bren Entertainment – Shading Senior Artist Oct 2009 – Jul 2010

Shading and look dev for “**Snowflake**” feature film

Dygra Films– Matte Painting Supervisor Jul 2008 – Oct 2009

Responsible for the department pipeline and 2D, 3D mattepaintings and camera projections for “**Holy Night**” animated feature film.

Ilion Animation Studios – Senior Matte Painter Oct 2007 – Apr 2008

Matte paintings and design of the initial department pipeline for “**Planet 51**” animated feature film.

Bren Entertainment – Matte Painter, CG Artist & Lighting Lead Jun 2005 – Jul 2007.

Started as texturer and shader, then set lighter, and finally matte painter. I've also contributed to the pipeline developing XSI scripts and solving different technical problems. Worked in “**Donkey Xote**” animated feature film.

Gargore Multimedia – CG Character Artist Oct 2007 – Apr 2008

Creation (models, textures and rig setup) of main characters for the game “**Heroes of Might and Magic V**” (Ubisoft).

Education

Master's degree in computer engineering Sep 1996 – June 2003, University of Vigo (Spain)

- The master's degree project was based in Computer Vision and Algorithms (C++).
- The bachelor's degree project was a 3D editor for building scenes (C++, OpenGL).

Skills

Traditional media, Off-line Rendering, Real-time Rendering (OpenGL, GLSL), CG and Computer Vision algorithms, full-stack Web technologies, UI/UX design.

Languages: C/C++, Rust, Python, PHP, Javascript, Lua, Objective-C, English, Spanish, Galician.

Software (usage and scripting): Blender, Nuke, Maya, 3D Studio Max, Unreal, Unity, Houdini, Photoshop, After Effects.
